

Co-designed by Droog Design and İnci Mutlu, **Potsink** is the most recent product of Vitra's superior technology and stylistic originality, bringing your bathroom a breath of fresh air.

"**Potsink** is not a pot, because it is not made of the kind of clay used in ordinary pots. **Potsink** is constructed from special vitrifiable clay, fired at 1200°C and glazed for exceptional durability and hygiene.

Detached from nature and isolated in a world of artificial constructs, the more we are alienated from the natural sphere, the more we lose touch with our inner selves. **Potsink** aims to renew our connection to the real and the genuine, and to reawaken us to the essential link between form and functionality."

-İnci Mutlu

Potsink represents a "back to basics" approach. And the "basis" of a porcelain sink is a terra cotta urn... Or a primeval washbowl... Or a flower pot... The simple and familiar form of **Potsink** leaves you free to bring your imagination into play.
