The total solution.*

VitrA

Continuity. It can make or break the design of any space. Bathrooms are no different.

That's why one company designs and creates every component - from tiles to bathtubs and washbasins to furniture. Vitra is the only global brand that totally designs and creates everything for bathrooms.

Whether the design is for a highly selective individual, or a highly frequented public institution, Vitra provides architects, designers and contractors with unrivalled choice, flexibility and continuity of design – as well as the ability to offer package solutions.

Every bathroom situation is different. Vitra's 60+ year commitment to superior design, technological innovation and exceptional quality, paired with its total bathroom continuity, set it apart as an ideal solution for any scale or scope of project.

8 - 37
Public solutions

VitrA

Washrooms in high-traffic areas such as airports, railway stations, and stadiums require extra upkeep and hygiene. Vitra's broad range of solutions offers planners an unequalled selection with added sanitary functionality, superior durability and ease of maintenance.

1

Arkitekt undercounter basin, Aquatech photocell-controlled basin mixer and Arkitekta built-in liquid soap dispenser

2

Arkitekt washbasin with half pedestal and Aquatech photocell-controlled basin mixer with Arkitekta liquid soap dispenser

3

Arkitekt urinal with integrated electronic flusher (with battery or main supply operated)

4

VitrA's innovative fixing systems allow urinals, anchored by a chain on the back, to be securely fastened to the wall during installation. Also this helps maintain urinals without uninstalling them.

High-Traffic

VitrA's Arkitekt range has the largest selection of washbasins. Half-pedestal basins and concealed cisterns enhance the feeling of spaciousness, making high traffic zones feel less crowded.

Urinals, concealed cisterns and faucets are all equipped with hands-free (photocell) technology. Working in conjunction with technologies such as VitrAclean, VitrAhygiene and VitrAoxygen, provides bathrooms with a greater degree of freshness, cleanliness and healthiness.

1
S50 washbasin with half-pedestal, Slope basin mixer and Arkitekta liquid soap dispenser

2
S50 urinal with integrated separator and electronic flusher

Another concealed flushing system is not needed since the product has a built in flushing mechanism. The installation mechanism is not visible therefore creates a uniform shape and facilitates cleaning

3
S50 wall-hung WC pan and electronically operated concealed cistern control panel

Urinals in this range are designed with built-in separators for user privacy. In addition, urinals are flat-mounted to the wall with a special system, which permits easier cleaning and as a result, better hygiene.

1-3

VitrA wall-hung WC pan and concealed cistern combinations allow easy cleaning of the bathroom floor. Mounting the cistern within the wall enhances water hygiene while expanding the bathroom space.

Advanced flushing mechanisms are highly durable and help save water (and money) by using water efficiently and effectively.

Standard and rapid mounting concealed cisterns: VitrA's range of concealed cisterns allows you to save water as well as space. All cisterns are easy to install and are extremely wear-resistant.

Water conservation

Concealed cisterns, with 3 or 6 lt dual flushing systems, conserve water by using just the required amount for a thorough cleaning.

4

Electronically operated concealed cisterns

The hands-free model provides safe and continuous hygiene in public washrooms. The system flushes the WC with 3 lt or 6 lt of water dependent on the period of use, and during long periods of disuse it performs an automatic flushing every 12 hours

Clockwise from top left:

(Interruptable Concealed Cistern Control Panel)

Vitra GR-AERO

(Pneumatic Concealed Cistern Control Panel)

Vitra GR-STEP

(Dual Flush Concealed Cistern Control Panel)

Vitra GR-CELL

(Electronically Operated Stainless Steel Concealed Cistern Control Panel)

5

Vitra's special mounting system facilitates aesthetically pleasing wall-mounted installation. Wall hung installation also offers improved hygiene through easier cleaning.

Vitra washbasins, WC pans and urinals don't just look smart, they are smart. Odour-free electronically operated systems and hands-free faucets promote superior hygiene and water saving.

VitrA is, literally, all about clean design. Not only does it feature award-winning design products that improve the tidiness of bathroom environments, but also innovative features and a range of technologies also improve hygiene and cleanliness. All in all, VitrA's performance is nothing less than spotless.

1-2

VitrA toilet seats are available with detachable and soft-close seat options. They can be fixed with top-tightened hinges. Espace, Step, Softcube, Mona, Nuova, Retro, Eura and Luna series all come with their own specially produced soft-close toilet lids, as well as special bidet and urinal lids for some of them, so that they coordinate seamlessly with their highly individual designs.

3

S50 washbasin with half pedestal and Aquatech SST (surround sensitive technology) electronic basin mixer

4

S50 wall-hung WC pan and Arkitekta WC brush holder and roll holder

Tourism

Touristic facilities serve large numbers of people. Hygiene is a top priority, as are ergonomically designed products that answer highly specialised needs. Vitra's sanitaryware and complementary products satisfy planners' varying requirements by providing unmatched choice and functionality in the design of such washrooms.

1

S50 washbasin and shelf unit with Diagon faucets and accessories

The shelf unit under the washbasin creates space where you can store towels and personal effects

2

S50 wall-hung WC pan

3

Artepan radiator

Comfort and aesthetic appeal are essential to create bathroom facilities for the tourism industry. Function and cleanliness are important, as is the desire to create a space that makes guests feel at home when they're not.

- 1
Nuovella washbasin and washbasin unit with Illia basin mixer and Mia accessories
- 2
Nuovella mirror and shelf unit

1

Arkitekt corner washbasin and Armix Std basin mixer

Corner washbasins save space in tight quarters, while a wide selection of different washbasins provide flexibility of design.

2

Arkitekt wall-hung WC pan and Arkitekta accessories

Arkitekt wall-hung WC pans, buttressed by rapid-mounting concealed cistern installation frames, can bear loads of up to 400 kg of weight.

VitrA offers many ranges with the option of smaller sizes to make tighter spaces – such as small hotel room bathrooms – work harder for guests' comfort VitrA assures an excellent fit and finish everywhere you desire

1
SS0 washbasin with half pedestal, Slope basin mixer and Minimax accessories

2
SS0 wall-hung WC pan and Minimax toilet roll holder

Short projection WC pan 48cm is the most space efficient solution for your bathroom

3
Universal corner shower tray

Enduring beauty...

VitrA Solid – a brand new product series from VitrA.

Cast from polyester-based resin, the long-lasting, functional and stylish VitrA Solid is an attractive new solution for tourist, public and residential spaces.

VitrA Solid is extremely hard-wearing because it is cast as a single piece and is resistant to most chemicals. Accidental scratches are easily mended to restore an unblemished look. Created to retain just-out-of-the-box good looks year after year, VitrA Solid offers professionals a unique set of characteristics, including its exceptional durability.

- 1
VitrA Solid VS-20 vanity basin and Arkitekt undercounter basin with Matrix basin mixer and Arkitekt double sided mirror suited for cosmetic & shaving needs
- 2
VitrA Solid VS-10 vanity basin with Matrix basin mixer and Arkitekt liquid soap dispenser
- 3
VitrA Solid VS-40 vanity basin with Ilia basin mixer, Ilia towel holder and Arkitekt liquid soap dispenser

Hygienic
Non-porous surface is impervious to water and bacteria.

Machinable
Material is machinable with wood-working tools for easy repairs and modifications.

Stain-resistant
High-tech non-porous material is resistant to staining and easily retouched with household cleaning agents.

Homogenous
Material is cast throughout with pattern, allowing for uniform cross-sections.

Chemical-resistant
Not harmed by household cleaning agents; avoid acidic contamination.

Firm
Crumble-free and sturdy thanks to its dense, homogenous substance.

Non-flammable
Resistant to flames.

Durable
High quality surface with superior structural, thermal and physical properties ensures long years of comfortable use.

VitrA Solid products offer stylish choices – Single tone or grained patterns are available with the choice of 12 different colours. Natural-looking materials smoothly blend in with bathroom ceramics and furniture.

VitrA is serious about hygiene. VitrA Solid's non-porous surface is impervious to bacteria and surfaces are stain-resistant and easy to clean.

Culture

Museums, theatres, shopping centres and restaurants succeed based on an attention to detail and quality of experience. The washrooms that serve these facilities are no different.

- 1
S50 wall-hung WC pan, electronically operated control panel and Arkitekta accessories
- 2
S50 wasbasin and Aquatech photocell-controlled basin mixer
- 3
S50 urinal, separator and electronic concealed flusher with battery or main supply-operated alternatives

Education

Whether they are universities or nurseries, learning environments are demanding. Fortunately, Vitra is more than up to the challenge with highly durable designs that come in all shapes and sizes.

1

Matrix circular washbasin, Matrix basin mixer and Arkitekta accessories

2-3

Odour-free technology for WC pan-cistern combinations and wall-hung WC pans with concealed cisterns

For either residential or public use, Vitra's hands-free, odour-free technologies are available on all compatible close-coupled toilet bowls and concealed cisterns, eliminating unfavourable smells at the source. Even when there's a power outage toilets still flush thanks to a 9-volt rechargeable battery that ensures 24 hours of function (but not odour-absorption).

Keeping educational facilities clean is always a challenge. Innovations such as VitrAhygiene, a special glazing finish available on all VitrA ceramic sanitaryware products, prevent the spread of bacteria with 99.9% resistance, keeping young minds and bodies healthy.

1
Arkitekt child washbasin, Armix Std basin mixer and Alfa accessories

2
Arkitekt Child WC pan with duroplast seat and Alfa accessories

Child-sized WC pans and washbasins encourage hygiene for the youngest members of our society.

Healthcare

Medical institutions and care facilities require special attention to ergonomic comfort and superior hygiene. Vitra offers a complete range of solutions for the elderly or people with restricted mobility – with details such as higher standing toilets, handrails and support bars, as well as improved hygiene from features such as Aquaseat, which adds personal cleaning functions to the toilet – improving conditions for the cared-for and care-giver.

1

S50 special needs washbasin and Aquatech photocell - controlled basin mixer

Special design of the washbasin helps approaching to the washbasin with wheelchair

2

S50 special needs wall-hung WC pan with 135°-angled hand rail and hinged arm WC grab bar made of special reinforced glass polyamid plastic materials

Grab bars are a great aid when using the WC pan

3

Folding shower seat and Arkitekt grab bar

Home Solutions

VitrA

Individual Homes. Individual Designs.

Regardless of its size, a home bathroom is vastly different from a public washroom. Instead of performing for mass appeal and functionality the home bathroom needs to be tailored for highly individualized people and situations.

Fortunately Vitra provides a wealth of flexible options and styles for homes – answering extremely specific tastes and needs while providing the high quality, durability, and aesthetic value that clients expect.

Trend-setting, innovative and high tech, Vitra's different bathroom series offer contractors a wealth of integrated, flexible solutions that easily answer the challenges of any residential project, no matter the scope.

- 1
Matrix circular washbasin, washbasin unit, Matrix basin mixer and Matrix accessories
- 2
Matrix wall-hung WC pan and Matrix accessories

To create inspiring spaces start with Vitra. Its high aesthetic value and superior quality are matched by intelligent design that impresses the mind as well as the eye.

1
Retro washbasin, washbasin unit and Ilia basin mixer

2
Retro wall-hung WC pan

VitrA's product ranges provide the diversity and selection needed to keep up with the ever-changing trends and demands placed upon developers.

VitrA

The Technology Of Bathroom Culture

Technology not only allows us to create more aesthetically pleasing bathrooms, but also safer, more hygienic spaces as well. Greater cleanliness improves every aspect of our lives. After all it's the reason bathrooms were invented in the first place.

Odour-free

VitrA^{oxygen}

People go to great lengths to mask disturbing smells. But why not eliminate them outright? Our unique Odour Absorption System traps unpleasant odours with a fan and filter system in the cistern, which automatically absorbs malodorous molecules. This is also paired with an optical sensor that automatically flushes so that the airborne particles that create nasty smells never reach your nostrils. Better yet, your bathroom not only smells better, it is more hygienic.

Stain-free

VitrA^{clean}

Limescale is persistent in most bathrooms. VitrA^{clean} technology is a special double-glazing process that makes washbasins, WC pans, urinals and bidets water repellent. No harsh chemical cleaning agents are needed to keep them beautifully stain-free for years.

Aquaseat

Personal hygiene is thoroughly improved by Aquaseat, the ultimate toilet seat, which improves WC pans with gentle washing and bidet functions. Options include water heating, odour absorption and VitrA^{hygiene} for enhanced anti-bacterial protection. Eco, Basic, Lux and UltraLux models are all available for your home. The removable seat allows for simple cleaning, while its soft-closing hinge mechanism reduces noise and risk of injury from slamming seat lids and covers.

Hands-free

Not only used for public washrooms, optical sensors promote a healthy, hygienic home. Available for a range of different flushers and concealed cisterns, they are also easily paired with VitrA's exclusive Odour-Absorption System.

Bacteria-free

VitrA^{hygiene}

In moist environments, an extra degree of protection is needed to deter nasty bacteria. VitrA^{hygiene} is a unique glazing process available on all ceramic sanitaryware (washbasins, WC pans, bidets and urinals). By adding silver ions to the raw glaze it offers almost 100% protection against the spread of bacteria. Extremely hard-wearing, VitrA^{hygiene} glaze will last the lifetime of any product it's been applied to.
